

# ASC DIGITAL TRANSFORMATION FRAMEWORK

## IMPROVE SCALABILITY BY 40% AND SELECTING THE RIGHT PROCESSES BY 30%.

### 1 GENESIS

Functional Strategic Readiness

- **Digital Capability Maturity Evaluation:** Discover organizational readiness to scale for a competitive advantage, evaluate alignment of people/process/culture/business priorities, and identify business service reuse/component library/change management/innovation to determine capability of a structured approach to save time, avoid problems, simplify prioritization, and keep stakeholders well informed for sustained innovation and delivery.
- **Process Genesis Workshop:** Develop a framework to select the right enterprise-level manual processes, effective prioritization of selected processes, and create organizational demand pipeline of high-value digital candidates.

### 2 REVEAL

Operational Strategic Engagement

## 100% DIGITAL STRATEGY SUCCESS, PROVEN GOVERNANCE, OPERATING MODEL, AND ANALYTICS.

- **Strategic Alignment Round Table:** We take a deep dive with your leadership to answer key strategic questions. We then hash out the most efficient paths forward for you, saving time and creating digital initiative.
- **Governance and Operating Model:** Avoid digital project inconsistencies by creating a governance and operating model to consistently manage digital demand, make the right decisions, align with enterprise goals and priorities, and guarantee scaling. Integration of applications, technology, and service delivery to create infrastructure nimbleness.
- **Analytics, Metrics, and KPIs Axiom:** A fundamental set of understandable measurements for financial transparency and quantitative data to track software robot performance, risks, and successes.
- **Short-Term Roadmap to Success:** We create a 12-month plan that will reveal the right type of processes to deploy at the right time for a positive ROI.

### 3 EMBRACE

Transformational Strategic Engagement

## >95% SUCCESS SELECTING RIGHT DIGITAL TOOLS, ANALYTICS FRAMEWORK, LONG-TERM ROADMAP

- **Digital Tool selection:** Guidance to avoid unnecessary expense by preventing selection of the wrong tool that could result in an inability to meet demand and scale your digital initiative.
- **Analytics, Metrics, and KPIs Framework:** A framework to guide you in creating measurements that anticipates organizational needs, discover trends, mitigate risks, create operational efficiency, and predict ROI for timely and accurate decision-making, and goal tracking.
- **ROI Calculator:** A calculator that will create enterprise-level digital initiative transparency for clarity of digital program costs and savings, understand bottom-line benefit, and create consistent ROI reporting.
- **Long-Term Roadmap to Scale:** We create a 24- to 36-month success path and clear vision to scale the right type of processes at the right time for a positive ROI.
- **Digital Center of Excellence Playbook:** A playbook that details set up of a CoE to end the guesswork and decrease time to establish a CoE.

### 4 ELITE

Premium Services Delivered by 3rd Party Partners

- **Execute Proof of Value for Selected Process:** 2–4-week PoV to prove digital viability to decision-makers.
- **Digital Center of Excellence Staffing + Knowledge Transfer:** Define roles and responsibilities, staff the CoE for a fast, efficient start, and knowledgeable resources transfer CoE knowledge to internal staff.
- **Organizational Engagement Playbook:** Communicate the right messaging and the right time to avoid employee uncertainty about digital, digital workers, and software robots.
- **Development, maintenance, and support:** Staff your project with experienced business analyst and developers who will document requirements, develop, deploy, support, maintain software robots, and save on expenses.
